

FRUCT  **MAT**

BY ASCO DRINK MACHINES

FRUCTOMAT - MANY ADVANTAGES FOR YOU AND THE ENVIRONMENT

PLASTIC-FREE
DRINK DISPENSING

Our family business researches, develops and produces 100 % in Austria. ASCO DRINK MACHINES is the number 1 in Europe and your reliable partner in the field of modern and environmentally friendly drink machines.

A FUTURE-PROOF INVESTMENT

Our smart systems ensure less plastic waste.

High flexibility and high-quality products

FRUCTOMAT offers high-quality processing, durability and flexibility at every level. Many customers worldwide appreciate and trust in our products and services. In the field of drink solutions, ASCO DRINK MACHINES offers high quality products with state-of-the-art technology.

Years of experience have provided ASCO DRINK MACHINES with the necessary know-how and flexibility to offer suitable solutions for every customer!

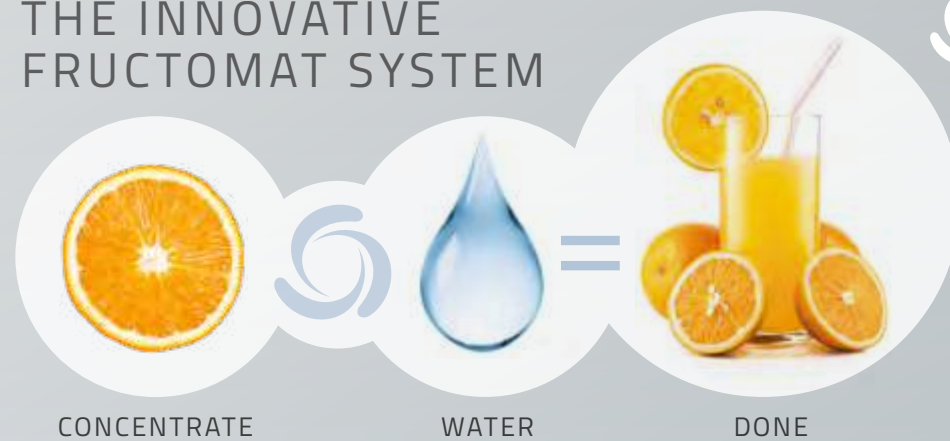

LESS WASTE – MORE SUSTAINABLE RETURN due to smart technology

Simply
more
efficient

THE INNOVATIVE FRUCTOMAT SYSTEM

■ **FRUCTOMAT: The new, patented and innovative drink system**

saves our environment a lot of noise, empty transport kilometres and emissions. Massive savings in warehousing, logistics, service and energy are only a few of the advantages.

Every FRUCTOMAT is an **efficient drink production unit**, dispensing fruit juices, soft drinks, teas or sports drinks from concentrate and fresh water – to your choice, still or with CO₂, hot or cold.

**PLASTIC-FREE
DRINK DISPENSING**

■ With FRUCTOMAT you can **significantly contribute to a more sustainable future. Less plastic waste** due to **smart technology**.

THE FIRST IMPRESSION COUNTS

■ Each FRUCTOMAT has been designed for optimal user-friendliness and product presentation. Clear design, simple handling and an individually illuminated and high-quality dispensing unit with the new **CRYSTAL SPOUT** make your FRUCTOMAT a success story that has been proven thousands of times.

■ **MidMix III – the further development of all PostMix systems!**

The drink concentrate is mixed completely sealed from air in a special mixing block and is injected into fresh water while the finished drink is dispensed through a special hygienic and tempered glass tube. This tube is then immediately rinsed with fresh water: **no residues, no drying up and visible cleanliness!** Experience hygiene at a new level!

► **You save on logistics & transport**
Depending on the beverage or concentrate used, FRUCTOMAT saves between 80 % and 95 % on logistics and transport costs.

► **You save energy**
FRUCTOMAT only cools the required quantity and thus, saves up to 80 % of energy (compared to refrigerators or bottle/can machines).

► **You save CO₂ emissions**
According to a university study each FRUCTOMAT saves the immense amount of up to 20,600kg CO₂ per year/per location!

THE ALL-PURPOSE SOLUTION individually adapted to you!

■ The new model range JUICI ID (Intelligent Design) offers **maximum flexibility** in all aspects. With only one touch you can choose between still or CO₂ or Hot & Cold. The new models are also equipped with a **height adjustable** drink exit. This means that glasses, bottles and carafes of all sizes can easily find their place. Depending on the space required and the installation variant, the concentrate cartons as well as the technics box (including the cooling unit) are stored in the machine housing, the base cabinet or, in case of wall mounted units, directly behind the dispensing unit.

JUICI ID intelligent design - unlimited potential!

MANY OPTIONS

- Column mounted on a counter with concentrate cartons, technics box and cooling in base cabinet
- Wall mounted with the dispensing unit on the wall and the concentrate cartons, technics box and cooling unit in the base cabinet or behind the wall
- Table-top unit with space for 3l, 5l or even 10l BiBs (Bag-in-Boxes) in the unit - depending on machine type
- Many different standard designs (custom design is possible)
- Edition FIX S 150 mm with a fixed dispensing height (OPTIONAL)
- Edition FIX L 290 mm with a fixed dispensing height and height-adjustable cup/glass shelf with 5 locking positions (OPTIONAL)

TOTALLY FLEXIBLE for small and big challenges

JDM CT-S

JDM CT-L

different height-adjustments possible (model JDM CT-L)

Items delivered:
technics box and tower
(technics box and concentrates in the base cabinet)

Custom designs possible

■ The counter-top dispenser JDM CT for 4 or 6 drinks and chilled water (CO₂ or Hot & Cold optional) is THE answer to space problems and has proven itself thousands of times. The Bag-in-Box cartons are stored in the base cabinet. An elegant and reliable solution for your counter!

ELEGANT AND TIMELESS

Each JDM CT offers you the greatest possible flexibility. Whether you wish to enjoy your drinks **with or without CO₂**, or **Hot & Cold** – you can do it all! The different models (S and L) allow for **various dispensing heights** (S max. 190 mm, L max. 310 mm), making enough space for glasses, bottles or carafes in the dispensing area.

With model L you will benefit from a height-adjustable support with a swivelling mechanism. Furthermore, you have the unique ability to print your own label or design onto the stainless steel front (laser or colour print). And on top of that, **various installation options** are available to you: **wall installation**, table installation, direct drain etc.

AVAILABLE IN THE FOLLOWING VERSIONS:

JDM CT-S 4/6

JDM CT-L 4/6

JDM CT-SPLIT S 4/6

JDM CT-SPLIT L 4/6

OPTIONAL for all models: CO₂
or Hot & Cold

The control/dispensing unit can be mounted directly onto the wall

SHARING MAKES GOOD THINGS EVEN BETTER

more flexibility and performance

FLEXIBLE²

■ The SPLIT-system (without cooling in the technics box) is deployed if there already is an existing cooling system, a stronger external cooling is required (e.g. ice bank) or 2 devices next to each other should be operated with the same cooling.

The dimensions of the technics box SPLIT (without cooling) are very small (410 x 140 x 210 mm) and thus, it easily finds a storage place. The SPLIT-system enables completely new application areas - e.g. canteens: large output quantities in very short time periods - e.g. soft drinks: stable temperature for ideal carbonation and much more.

SPLIT (EXTERNAL COOLING)
– ALSO FOR 2 AND 3 DISPENSING UNITS WITH 4/6 DRINKS + WATER WITH ONLY 1 COOLING POSSIBLE!

OUR SMALL „SUPERHEROES“

minimum space – maximum performance

JDM SLIM 2

JDM SLIM 4

■ The **perfect partner** for anyone who is looking for an **elegant tabletop solution** but is short of space. Smart design for 2-4 concentrates and water (CO₂ or Hot & Cold optional). The concentrate Bag-in-Box cartons are easily stored underneath/behind the machine and a hose reaches the machine from below/behind making it possible to use larger bags e.g. 10 litres capacity as well.

Open the product selection panel for easy product label change and access to technics.

JDM SLIM 2 BIB

Easy change of Bag-in-Box cartons

SMALL AND MIGHTY!

■ The JDM SLIM 2 BIB – combines the advantages of our classic JDM 2 with the JDM SLIM 2 and is therefore the **perfect solution for small businesses**, offices, wellness areas, hair salons, buffets, canteens und many more.

■ Small in space - big in opportunities! The JDM 2 provides room for 2-3 x 3 litre concentrate (big cartons in base cabinets possible). The cooling capacity, flexibility and control are equivalent to the bigger models. Whether still or with CO₂, whether Hot & Cold, whether free vending or with a payment system incl. book-keeping function – everything is possible!

JDM 2

Model JDM 3 STILL – with room for 3 x 3l BiB

2 dispensing heights possible, with low or high drip tray

JDM WM 4

Extremely robust

BUILT FOR EXTREME USE

■ Our **wall-mount model JDM WM** was **especially designed for a tough working environment**. The direct installation **on the wall** and the **space-saving design** for 2-4 concentrates and water (CO₂ or Hot & Cold optional) are the **solutions for places short of space**. The JDM WM offers **plenty of room** for concentrates within the device (2-4 x 10l concentrate), **robust technics box** and cabinet as well as direct drain and much more...
